

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

Telegraphic Reports for Week Ended Aug. 6, 1921.

These reports are preliminary and the figures are subject to change when later returns are received by the State health officers.

New York.....	15	1,132	1		3,865		2	1,697	89	82
Pennsylvania.....	3	25	1		2,058	1	7	1,184	14	165
South Dakota.....	2	2			138			55	151	4
Wyoming.....					72			13	11	4

RECIPROCAL NOTIFICATIONS.

Connecticut—July, 1921.

Cases of communicable diseases referred during July, 1921, to other State health departments by department of health of the State of Connecticut.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Diphtheria:		
Guilford, Conn.....	State Department of Health, Albany, N. Y.	Patient was apparently infected by sister from New York City. Onset of disease was 8 days after patient's arrival from New York City.
Danbury, Conn.....	do.....	
Montville, Conn.....	do.....	Patient became ill about five days after leaving Brooklyn, N. Y.
Danbury, Conn.....	do.....	Patient was admitted to Danbury Hospital from a summer camp at Carmel, N. Y.
Epidemic encephalitis:		
Greenwich, Conn.....	do.....	Patient was removed from his home in Port Chester, N. Y., to Greenwich Hospital for treatment.
Measles:		
Madison, Conn.....	State board of health, Trenton, N. J.	Patient became ill 5 days after leaving South Orange, N. J., where she was exposed to a known case of measles.
Poliomyelitis:		
Hartford, Conn.....	State Department of Health, Albany, N. Y.	Patient arrived in Hartford from Brooklyn, N. Y., on July 2, becoming ill with poliomyelitis on July 4.
South Norwalk, Conn.....	do.....	The onset of disease was in South Norwalk, Conn. Child was removed to the Babies Hospital, New York City.
Smallpox suspect:		
New London, Conn.....	State Board of Health, Burlington, Vt.	A case of possible smallpox left New London, Conn., to go to Brattleboro, Vt.
Tuberculosis:		
Greenwich, Conn.....	State Department of Health, Albany, N. Y.	Patient went from Greenwich, Conn., to Otisville, N. Y.
Cos Cob, Conn.....	do.....	Patient went from Cos Cob (Greenwich), Conn., to Monticello, N. Y.
Typhoid fever:		
Hartford, Conn.....	State Department of Public Health, Boston, Mass.	Patient visited Rowe, Mass., while in the incubation period of typhoid fever, becoming ill with the disease on her return to Hartford.
New Britain, Conn.....	State Board of Health, Baltimore, Md.	Patient was taken ill two weeks after arriving in New Britain, Conn., from Baltimore, Md., where he was a student.

CITY REPORTS FOR WEEK ENDED JULY 23, 1921—Continued.

TUBERCULOSIS.

See p. 1958; also Telegraphic weekly reports from States, p. 1947.

TYPHOID FEVER.

The column headed "Median for previous years" gives the median number of cases reported during the corresponding weeks of the years 1915 to 1920, inclusive. In instances in which data for the full six years are incomplete, the median is that for the number of years for which information is available.
